

## Fresh Del Monte Produce selects agilesWorkflow

Fresh Del Monte Produce, one of the world's leading distributors of fresh and prepared fruits and vegetables, needed to better manage and track complex processes while meeting Sarbanes Oxley regulations in their Europe, Africa, and Middle East divisions. They selected Certified for Microsoft Dynamics® NAV agilesWorkflow because it met their specific needs, was Sarbanes Oxley compliant, and could easily be tailored to their complex workflows.

Fresh Del Monte Produce faced challenges in managing the series of processes, quality checks, and certificates required to ensure safe and accurate product deliveries. They sought a solution that could enhance or replace their previous system, comprised of Sage, KHK, RDV Fruit, and Baan components. The decision, which was driven by the company's UK IT division, hinged on two critical factors, including the ability to tailor processes, and Sarbanes Oxley compliance. Fresh Del Monte Produce chose agilesWorkflow and Microsoft Dynamics NAV for the solution's ability to meet their unique workflow needs, ensure compliance, and easily evolve with their company's ever-changing processes.

With their new solution in place, Fresh Del Monte Produce has dramatically reduced their paper-based processes by replacing more than 50 spreadsheet templates with automated workflow. And, they're assured they can easily maintain Sarbanes Oxley compliance with automated auditing of their many quality-checking processes.
